

The **Provider/placement LookUp Site** is an on-line system that allows Veryan WorkPlace (and other system) users to share health and safety visit information via a secure web site.

- ▲ *PLUS!* has been devised as a nationally shared system to maximise resources by preventing duplicate health and safety visits.
- ▲ The system can not be 'trawled' for information. Only very specific searches about known providers are permitted.
- ▲ The system holds only a very minimum of data. The 'owner' of the original data must be contacted to supply more detail to allow a placement to be made. The owning agency thereby remains in full control of its' own data.
- ▲ To subscribe to the system and perform searches, each participating agency must also agree to supply data.
- ▲ Veryan operate and administer the system as independent, 'honest brokers'. Veryan will make agreements directly with each participating Agency to guarantee confidentiality and not to release any data (or statistics about data) to any other party without the Agency's consent.
- ▲ 'Non-WorkPlace' users can participate in the system, providing their systems can supply data files to a standard specification.
- ▲ If just WorkPlace users participate in the PLUS! system, we estimate this could amount to a database of around 500,000 providers.
- ▲ No special software is required to search the system, just a computer with an Internet browser, an Internet connection and a user account for the *PLUS!* system.
