

WorkView

Veryan WorkView is a comprehensive software tool for managing work experience in schools and colleges where an Internet connection is not available.

- ▲ Manage any number of groups of students and any number of different types of jobs across multiple time periods.
- ▲ WorkView can be used in many different ways to suit many different working methods. Any number of installations can be made on any one licensed site.
- ▲ WorkView follows a single, national design, continually updated to meet the needs of users and best practice in all areas. Users are thus assured of a system which is always up to date but without the overheads of individual system development.
- ▲ A flexible set of system preferences allow administrators to tailor WorkView to their particular needs.
- ▲ 'Flag' fields allow users to tag, print and track document progress in all areas of the system.
- ▲ Version 6, released in Spring 2003 has been completely revised to make it even more powerful, flexible and easier to use than before, including
 - A new, wider choice of installation methods.
 - Simpler data interfaces with school admin' systems.
 - On-screen context sensitive help for all users.
 - A wider choice of standard reports and
 - Powerful mail-merge reports from all data areas.
- ▲ WorkView is a Microsoft Access application. It is compatible with Access 97 and all later versions and will run on any PC with MS Access installed.
